Set language of webpage

All webpages and pdfs must have a language set to be accessible. This should be added to the page layout if you are using T4 above the <head> section.

```html
<!doctype html>
<html lang="en">
<head>

```

<table>
<thead>
<tr>
<th>Set language</th>
</tr>
</thead>
<tbody>
<tr>
<td><code>&lt;html lang=&quot;en&quot;&gt;</code></td>
</tr>
</tbody>
</table>
```
